1. What CareBridge is

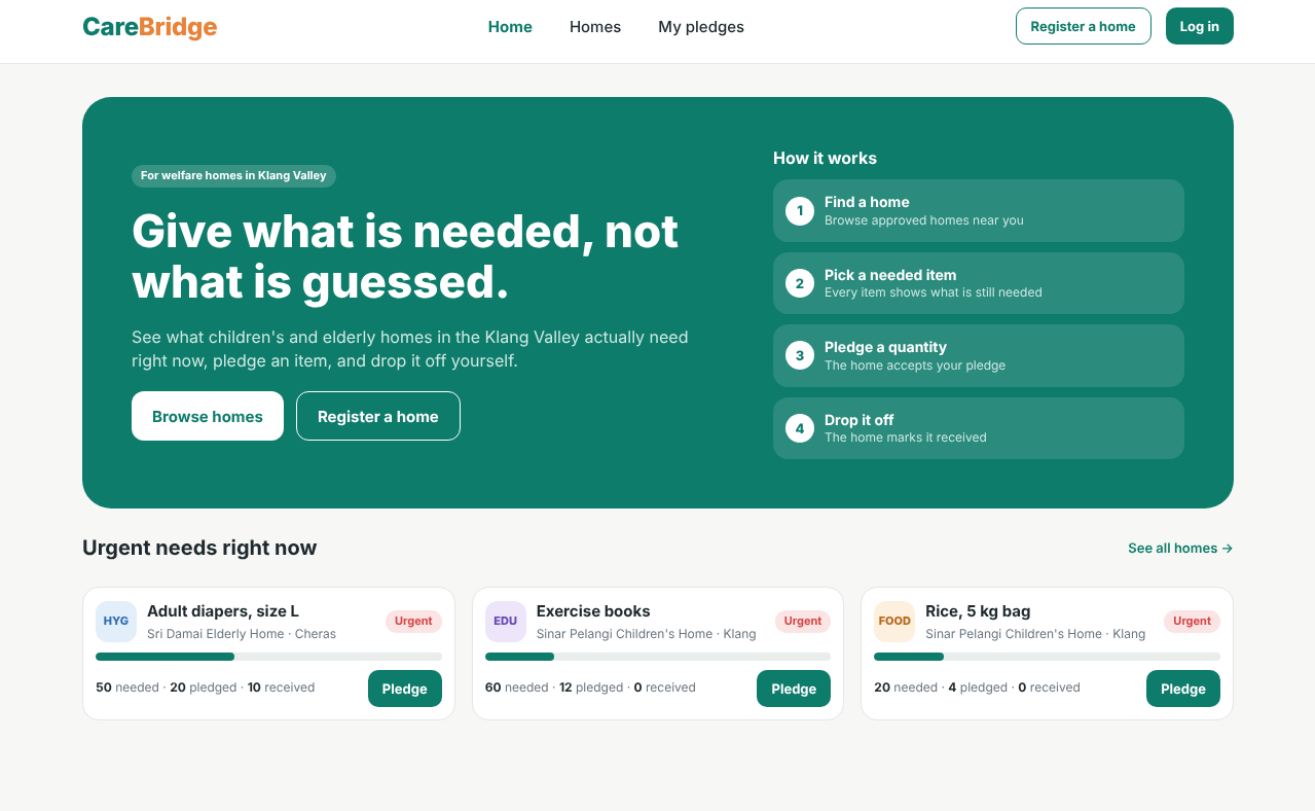

Give what is needed, not what is guessed. Welfare homes in the Klang Valley often receive donations they don't need while real needs go unmet. CareBridge fixes that with a live wishlist for each home: donors see exactly what a home still needs, pledge an amount, and drop the items off. The counts update by themselves, so two donors never send the same thing twice.

Who uses it

Role	What they do	How they get an account
Donor	Browse approved homes, pledge items, track pledges	Signs up with Google or email
Home manager	Runs one welfare home: wishlist, pledges, other managers	Signs up as a welfare home, or is invited by another manager
Platform admin	Approves homes and keeps the platform safe	Added by another platform admin (does not sign up)

The pledge journey

1. Home posts a need	2. Donor pledges	3. Home accepts	4. Donor drops off	5. Home marks received
e.g. 30 packs of adult diapers	chooses an amount and a drop-off date	donor is notified with the address	at the home's drop-off hours	the count updates and the donor gets a thank-you

The home page on a computer

2. Getting started

Open or install the app

Open carebridge-topaz-eta.vercel.app in any browser. On a phone you can install it so it opens full-screen like a normal app and can send notifications:

Phone	Steps
Android (Chrome)	Tap ⋮ → **Install app** (or **Add to Home screen**). The CareBridge icon appears on your home screen.
iPhone (Safari)	Tap **Share** → **Add to Home Screen** → **Add**. On iPhone, notifications only work from the installed app (iOS 16.4 or newer).

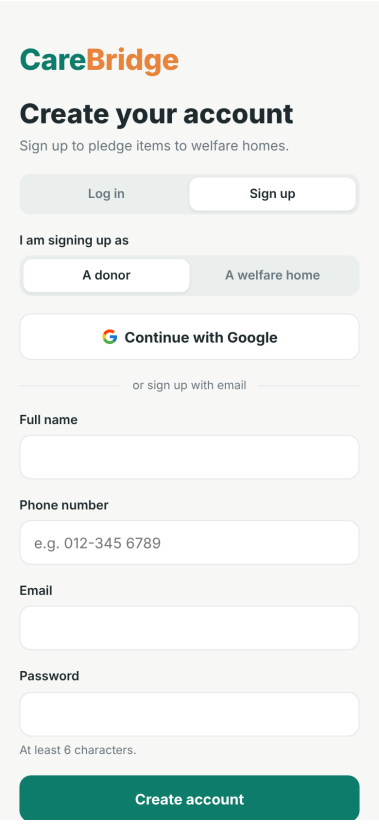

Always use the main link above. Vercel preview links (with *git-main* or random letters in the address) are for developers and log-in will not work there.

Sign up

1. Tap **Log in** (top right) and choose the **Sign up** tab.
2. Choose **A donor** or **A welfare home**.
3. Tap **Continue with Google**, or fill in your name, phone, email and a password (at least 6 characters).
4. Email sign-ups receive a verification email. Click the link in it.
5. Donors land on **Welfare homes**. Welfare homes go straight to the **Register a home** form (section 4).

Log in later the same way. Forgot your password? Tap **Forgot password?** on the log-in screen and follow the email.

University (UM) Google accounts may be blocked by the university's Google settings. If Google sign-in fails, use the email form with the same address instead.

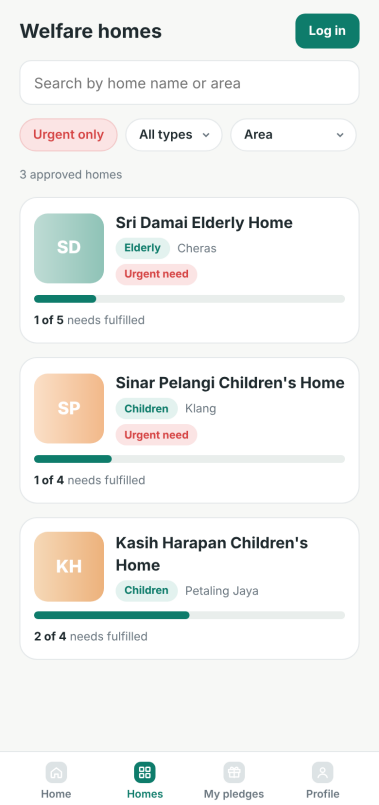

Sign up

3. Donor guide

Find a home

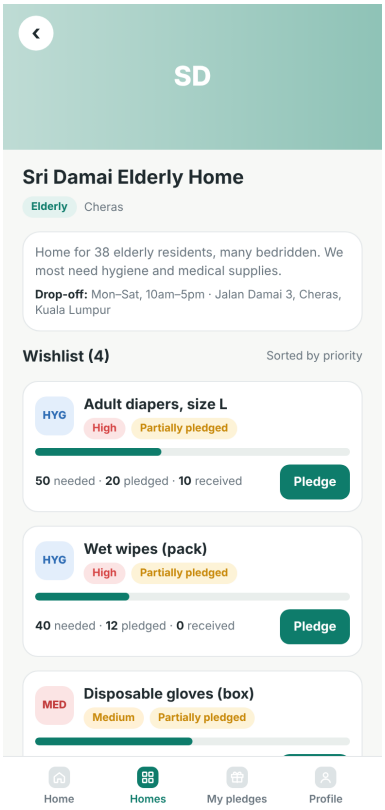

- The **home page** shows how it works and **Urgent needs** (high-priority items still open).
- **Homes** lists every approved welfare home with its type, area and a fulfilment bar (*X of Y needs fulfilled*).
- Narrow the list with **search**, **Urgent only**, home type, area and item category.
- Homes waiting for approval or rejected never appear.

Homes directory

Read a home's page

- About the home, its **drop-off address and hours**, and a public contact email if it shared one.
- The wishlist, most urgent first. Each item shows how many are needed, already pledged and still needed.
- Fulfilled and paused items are hidden; a line tells you how many needs are already fulfilled.
- Tags show the status: **Open**, **Partially pledged**, **Fully pledged**.

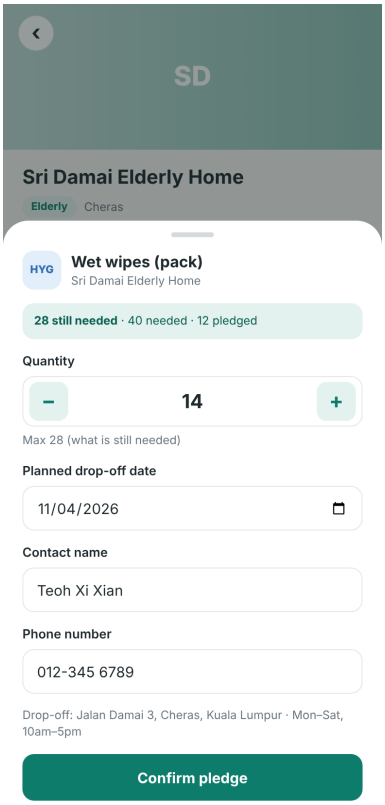

A home's page

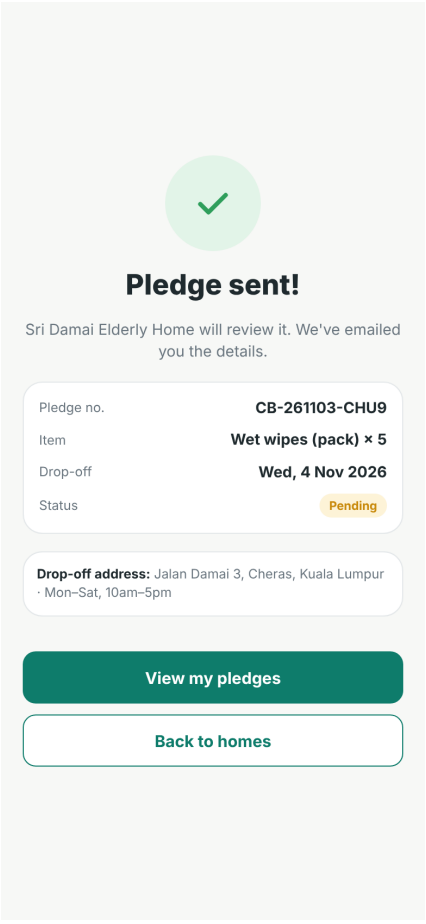

Make a pledge

1. Tap **Pledge** on an item. If you are not logged in, you log in first and come straight back.
2. Choose the **quantity**. You can't pledge more than is still needed.
3. Pick a **planned drop-off date** (today or later) and check your contact name and phone number.
4. Tap **Confirm pledge**. You get a pledge number like **CB-261103-A7K2** and the drop-off address.
5. The home now reviews it. You are notified when it is **accepted** or **declined**.

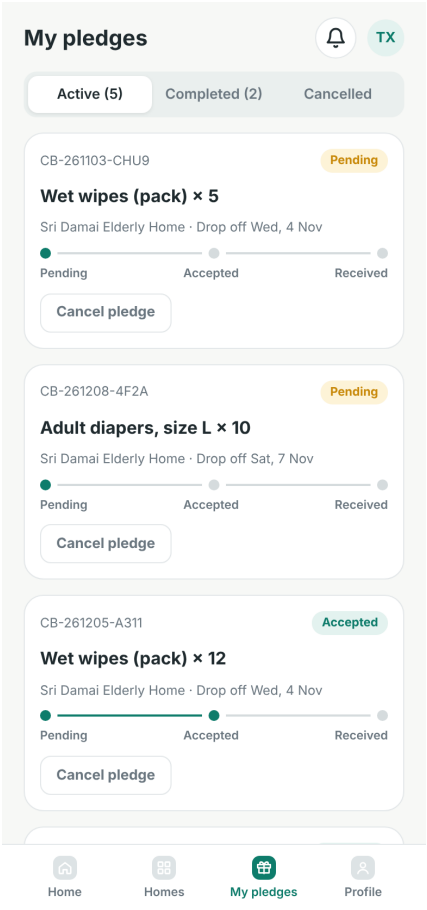

If two donors pledge the last units at the same moment, only one succeeds. The other sees a message that the amount is no longer available.

Pledge form

Pledge sent

My pledges

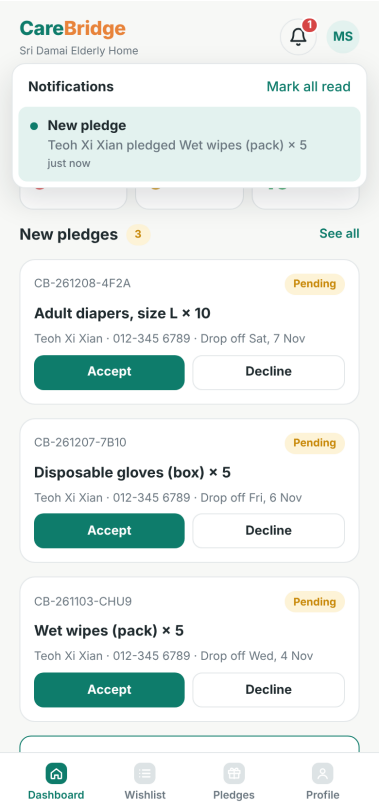

Track your pledges

My pledges has three tabs: **Active** (Pending or Accepted), **Completed** (Received) and **Cancelled** (Declined or Cancelled). Each pledge shows a timeline. You can **Cancel** a pledge until the home marks it received; the item's pledged count goes back down.

Pledge status	Meaning
Pending	Sent; the home hasn't answered yet
Accepted	The home expects your drop-off on the chosen date
Received	The home got your items. Thank you!
Declined	The home can't take it this time
Cancelled	You cancelled it

4. Notifications

- **In the app:** the **bell** shows a red count of unread updates. Tap one to open it; **Mark all read** clears the count.
- **On your phone or computer:** tap **Turn on** when CareBridge asks (or in **Profile**) and choose **Allow**. Updates then arrive even when the app is closed.
- **By email:** on by default. Switch **Email notifications** off in **Profile** if you only want app notifications.
- Emails come from the CareBridge mailbox; check your spam folder the first time.

The bell

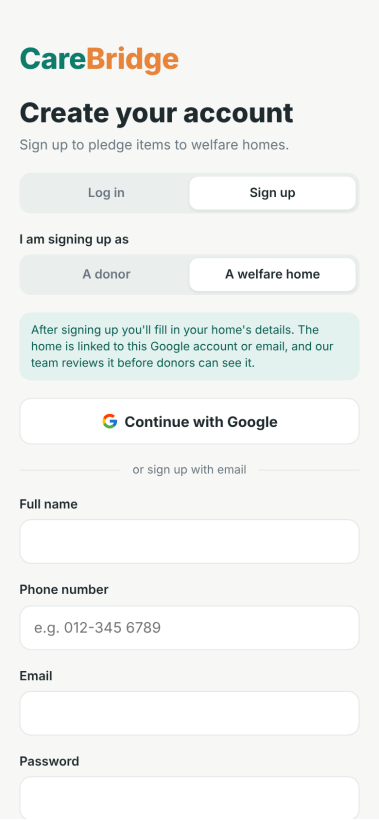

When this happens	Who is told
A donor pledges	The home's managers (New pledge) and the donor (Pledge sent)
The home accepts / declines	The donor
The home marks it received	The donor (Thank you)
A donor cancels	The home's managers
A home registers or asks for review again	Platform admins
A home is approved or rejected	The home's managers (with the reason)
Someone is invited as a manager or admin	The invited email address

5. Welfare home guide

Register your home

1. Sign up as **A welfare home** (section 2).
2. Fill in the home's name, type, area, address, drop-off hours, a short description and a photo. A public contact email is optional.
3. Tap **Submit for review**. A platform admin checks it, usually within a few days.
4. While you wait you can already prepare your wishlist; donors can't see anything yet.
5. You are notified when the home is approved. It then appears in the directory.

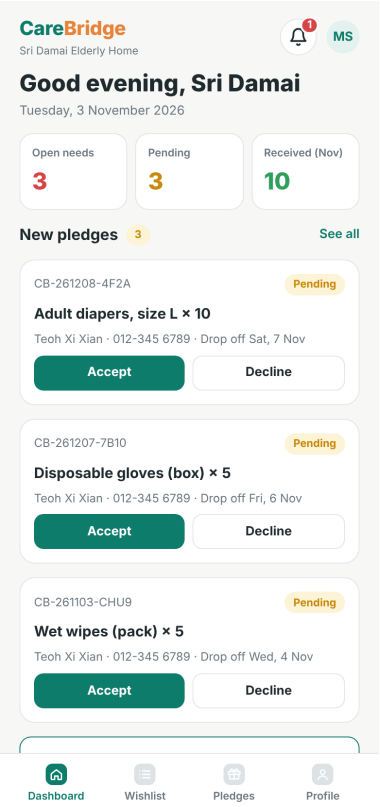

Rejected? A red note shows the admin's reason on every page. Tap **Edit home details**, fix what was asked, then **Ask for review again**.

Sign up as a home

Dashboard

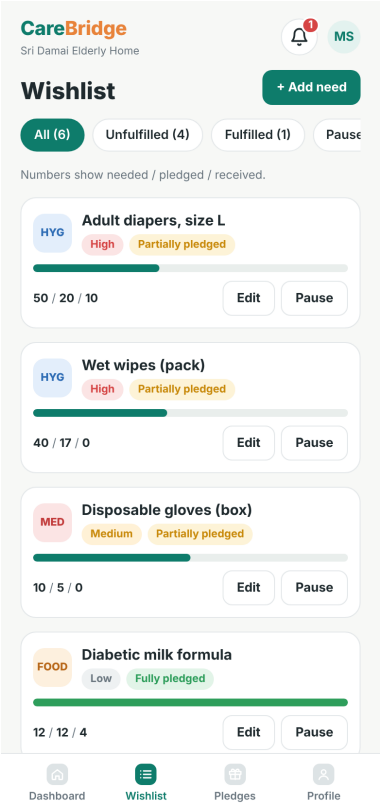

The dashboard shows your **open needs**, **pending pledges** and **items received this month**, followed by the latest pledges waiting for you. On a computer the menu is in the left sidebar; on a phone it is the tab bar at the bottom.

Dashboard

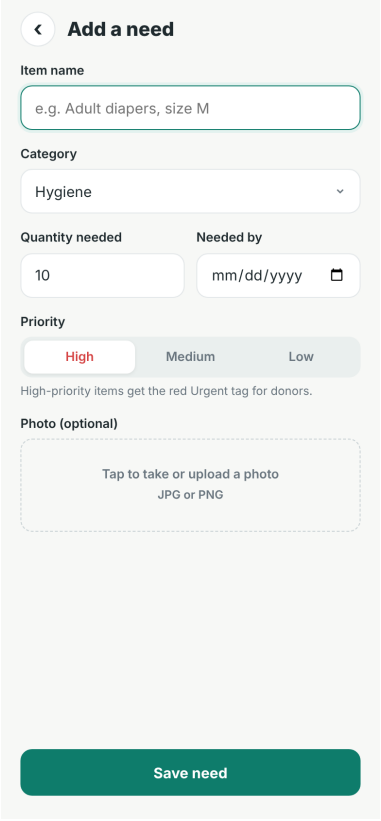

Manage your wishlist

- **+ Add need**: item name, category, quantity needed, unit, priority (High, Medium, Low) and an optional note.
- **Edit** a need at any time. The quantity can't go below what donors have already pledged.
- **Pause** an item to hide it from donors for now; **Resume** brings it back.
- Each row shows **Needed / Pledged / Received**. When received reaches needed, the item becomes **Fulfilled**.
- Filter chips: **All**, **Unfulfilled**, **Fulfilled**, **Paused**.

Wishlist

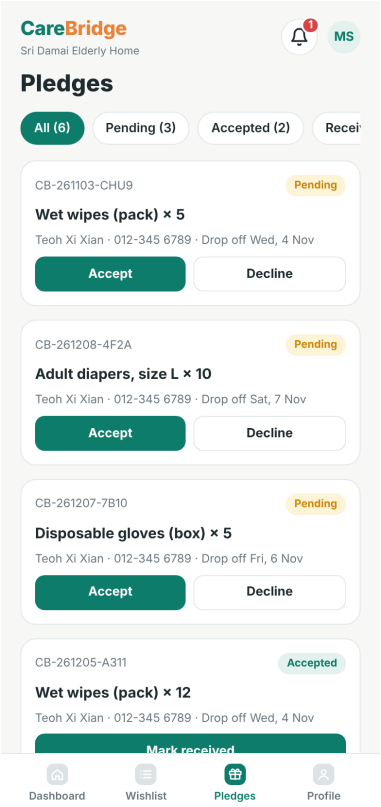

Adding a need. Mark truly urgent items **High**: they show in the **Urgent needs** section of the home page and are listed first.

Add need

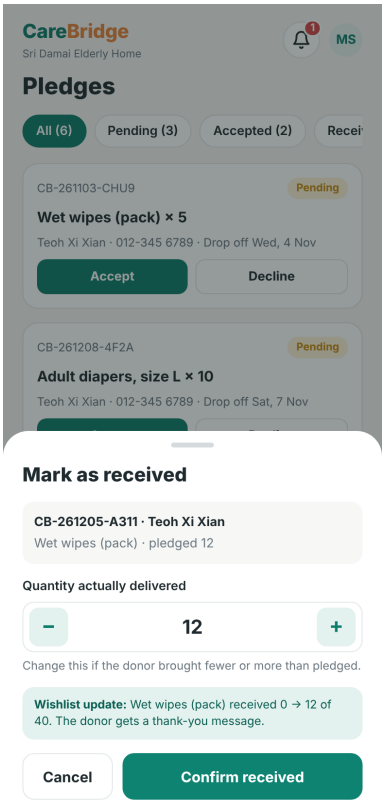

Handle pledges

- **Pledges** tabs: Pending, Accepted, Received, Declined / cancelled.
- **Accept** a pending pledge: the donor is told to drop off on the chosen date.
- **Decline** one you can't take: the item's pledged count goes back down so others can pledge.
- When the items arrive, tap **Mark received**. If the donor brought fewer, enter the real number; the rest is released.
- Donor phone numbers are shown only to the home they pledged to.

Pledges

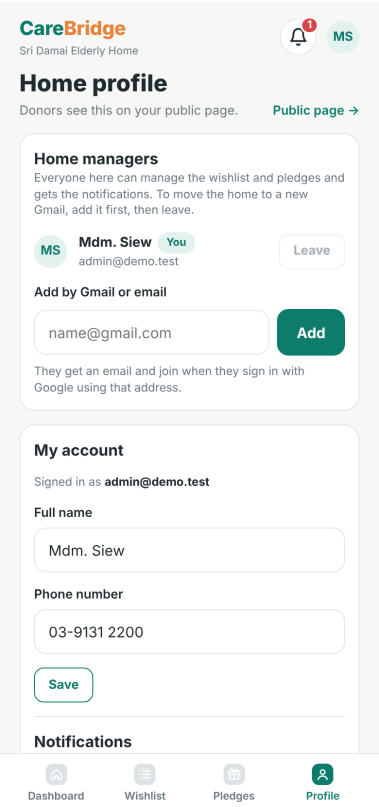

Mark received shows a preview of how the item's numbers will change before you confirm.

Mark received

Home managers and profile

- **Profile → Home details**: edit the description, hours, address and photo. Changes show on the public page straight away.
- **Home managers**: add another person by email. They get an invite email and join the home the first time they sign in with that email.
- Several managers can run one home; all of them get the notifications.
- **Remove** a manager, or **Cancel** an invite that hasn't been used.
- **Leave** hands the home over: add the new manager first, then leave. The last manager can't leave.
- Below that: your own name and phone, notification settings and **Log out**.

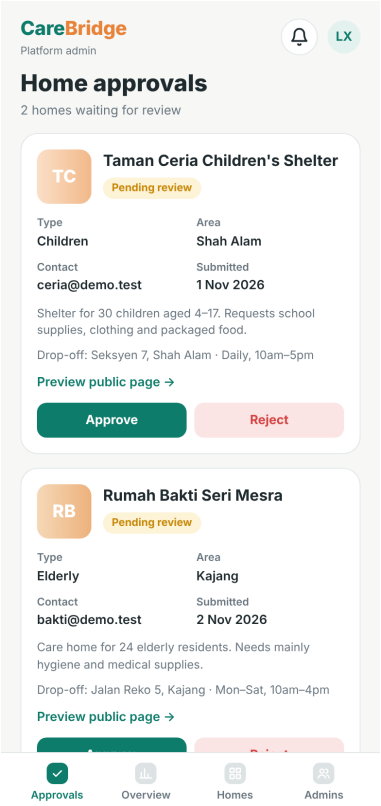

Home managers

6. Platform admin guide

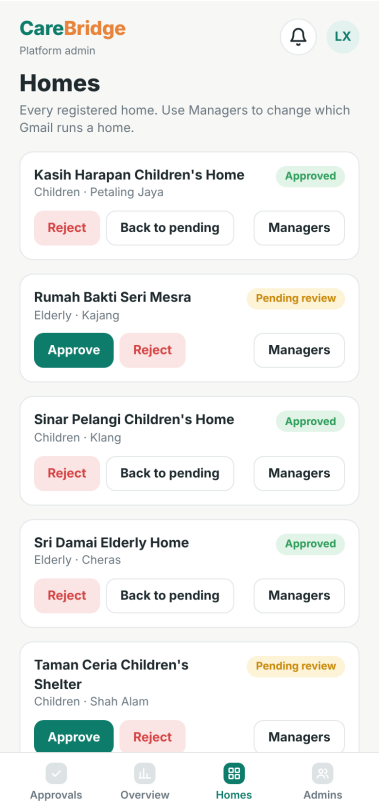

Platform admins don't sign up. The first one (xixianteoh@gmail.com) is built in; other admins are added in **Admins**. Sign in with Google using that email.

- **Approvals** lists homes waiting for review with their type, area, contact and submitted date.
- **Preview public page** shows exactly what donors would see.
- **Approve** makes the home and its wishlist visible to donors.
- **Reject** asks for a reason, which the home's managers see and can act on. Homes that ask for review again come back to this list.

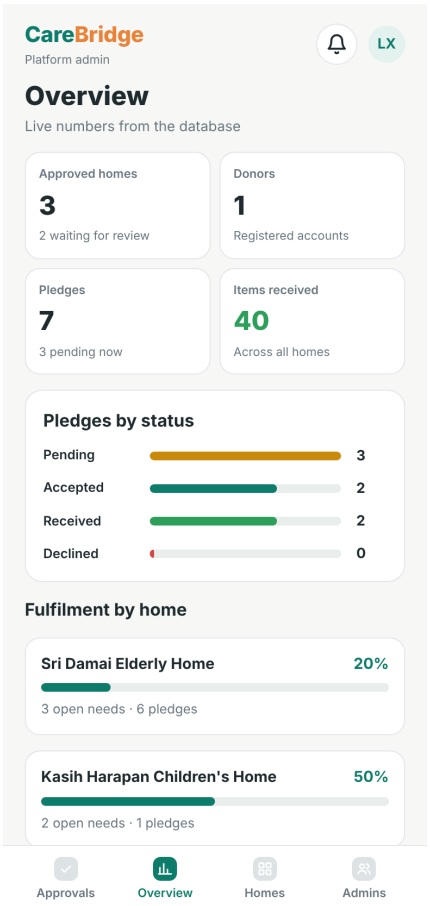

Approvals

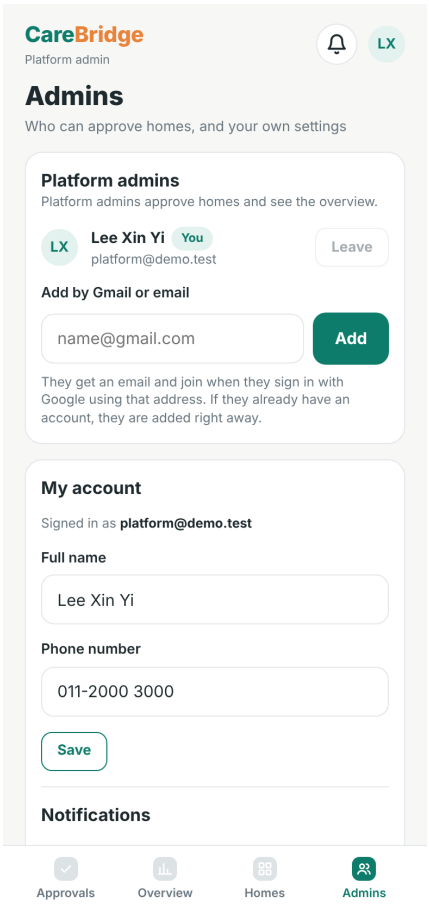

- **Homes** lists every home with its status. You can **Approve**, **Reject** or move it **Back to pending** at any time.
- **Managers** on a home lets you change which Google or email accounts run it, for example when a home's staff changes.

Homes

Overview

Admins

- **Overview** shows live totals (approved homes, donors, pledges, items received), pledges by status, and fulfilment for each home.
- **Admins**: add a platform admin by email (they become admin straight away, or when they first sign in), or remove one. There is always at least one admin.

7. Questions and troubleshooting

Problem	What to do
Log-in says the domain is not authorised	You are on a preview link. Open carebridge-topaz-eta.vercel.app instead.
Google sign-in fails with a UM account	The university may block outside apps. Use the email form with the same address.
I signed in with Google and became a donor, but I run a home	Open **Profile** → **Register a home**, or ask your home's manager to add your email.
No phone notifications	Install the app (iPhone needs it), tap **Turn on** in Profile and allow notifications. Check the phone's settings haven't blocked CareBridge.
No emails	Check spam, and that **Email notifications** is on in Profile.
My home isn't in the directory	It is still waiting for approval, was rejected (see the red note), or was moved back to pending.
I can't pledge an item	It is fully pledged, paused or fulfilled, or you entered more than is still needed.
The page looks out of date	Updates arrive by themselves within seconds. If not, pull down or reload.

Developers: see the **CareBridge Developer Manual & Test Checklist** in the same docs folder.
